SHIELD SAFE

Anti-cosmetic stain additive.

It's an ultra-concentrated liquid-neutralising additive to prevent polyquaternium-7 stains. The product is added to the pre-washing cycle and acts as an ion exchanger on polyquaterniums. The process breaks the ionic bond that binds the dirt and the substance by electrostatic attraction, thus preventing negatively charged particles from attaching to the polyquaternary residues during the wash cycle. The product is designed to be applied with **PGS® Systems** dosing equipment. Eco-friendly **ECO SAFETY®** bag-in-box packaging for higher performance and safer application.
